PERSONAL PROJECTS

Ilm-Ul Hadith (MERN Stack)

- Worked alongside two team members to create a Hadith Authentication System, guaranteeing precision and dependability in verifying Hadith sources. Aided in the progress of Islamic studies by introducing cutting-edge technological solutions, aiding in the safeguarding and accurate interpretation of authentic Hadiths in academic discussions.

HiSkyTechs Website

- I developed the Hiskytech website using HTML, CSS, JavaScript, and PHP, ensuring a responsive, user-friendly design. Integrated dynamic content features with PHP and enhanced interactivity through JavaScript. Optimized the site for performance, mobile responsiveness, and cross-browser compatibility.

Library Management System (PHP, MySQL)

- A Library Management System (LMS) automates library operations by cataloging books, managing inventory, handling member records, and facilitating borrowing and returning processes. It enhances efficiency with features like report generation, notifications, and digital databases, making library management streamlined and accessible.
